

PROFESSIONAL SUMMARY

SAP ABAP Consultant with ~2 years of experience in S/4HANA, RESTful ABAP Programming Model (RAP), Core Data Services (CDS) Views, OData Services, and API-based integrations. Delivered 20+ custom ABAP solutions for Mahindra & Mahindra (Project Harmony) at Bristlecone — spanning reports, interfaces, RAP applications, forms, and API integrations. Built 10+ AI Copilot skill files automating SAP SDLC workflows, reducing manual development effort by ~40%. Proficient in ABAP OO, AMDP, Fiori Elements, performance tuning (ST05/SAT/ATC) and ADT (Eclipse). Strong in debugging, root-cause analysis, and Clean Core extensibility.

TECHNICAL SKILLS

- SAP ABAP Development: Reports (Classical & ALV), Module Pool Programming, Enhancements (User Exits, BAdIs), Function Modules, ABAP OO (Classes & Methods)
- Modern SAP & UI: RAP (RESTful ABAP Programming Model), CDS Views, Custom Entities, AMDP, UI Annotations, Fiori Elements
- Integration & APIs: OData Services, REST APIs, RFC Framework, Custom BAPIs, Web Services (SOAMANAGER)
- SAP HANA & Performance: ABAP on HANA, Code Optimization, Performance Tuning
- Forms & Output: Adobe Forms, Smart Forms, Output Types Configuration
- Debugging & Support: Root Cause Analysis, Issue Resolution
- Automation & AI: SAP SDLC Automation, AI Agents, Copilot-based Workflows
- Tools: SAP GUI, ADT (Eclipse), Postman, Solution Manager, Microsoft Copilot Studio

PROFESSIONAL EXPERIENCE

Associate consultant | Bristlecone | Mumbai, India | June 2024 – Present

Project : Mahindra & Mahindra - Project Harmony

Designing, developing, and maintaining 20+ ABAP solutions across S/4HANA — including ALV reports, RFC interfaces, RAP applications, OData APIs, and Adobe Forms — for Mahindra & Mahindra's Project Harmony, serving 30+ end users across MM, PP, SD and FI modules.

- AI-Driven SAP Automation: Designed 10+ skill files for AI agents (Copilot/Eclipse) to automate SAP SDLC processes from BRD analysis to development workflows, reducing manual development effort by ~40%.
- Web Services Integration: Delivered an end-to-end interface project integrating 3 third-party applications with SAP via RFC-based Business Objects, Custom BAPIs, and SOAMANAGER-configured web services.
- MRP Report Migration: Migrated 3+ reports from SAP Datasphere to SAP Reports, designing custom tables and transaction codes that improved data accessibility and reduced report generation time by ~50%.
- Automated Invoice Due Notifications: Built automated notification system identifying pending customer dues and dispatching email reminders, improving collection cycle efficiency by ~25% across 50+ customer accounts.
- Debugging & Technical Support: Resolved 20+ complex technical issues across reports, function modules, classes, enhancement points, OData services, and forms through root-cause analysis.
- RAP Objects Development: Designed and delivered 3+ RAP applications using Custom Entities, CDS Views, and Annotations with Fiori Elements for Excel upload, reducing manual data entry time by ~50%.
- Forms & Output Types: Modified 8+ Adobe Forms, Smart Forms, and output types to meet compliance and formatting requirements.
- API Development: Created 5+ secure OData services and class-based APIs enabling robust SAP-to-external system data exchange.
